

# Sycamore Riverside Energy Center

The Sycamore Riverside Energy Center is a proposed 930 megawatt (MW) natural gas power generation facility in Sullivan County, Indiana, targeted to begin operating in 2028. Clean-burning natural gas power plants use cutting-edge technology and can quickly adjust power output, keeping energy reliable and supporting additional sustainable energy sources.

## Project Timeline

## Project Location

Located in Sullivan County

## Project Highlights

More than **\$124 million** invested in local tax revenue over the life of the project

**930 MW** is enough electricity to power more than **740,000 American homes**

Up to **300 jobs** supported during construction

Up to **25 full-time** operations and maintenance staff

**4 GE 7FA.05** combustion turbines

Supports local education, emergency & veteran services and environmental stewardship

Flexible operation allows for quick response to changes in energy demand

Invenergy's Cannon Falls Energy Center, located in Cannon Falls, Minnesota.

## A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$400 million annually in the home communities where its projects are located.

Invenergy has successfully developed over 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
